

بسم الله الرحمن الرحيم وبه نستعين إله خير ناصر ومعين الحمد لله رب العالمين وصلى الله على محمد وعلي وآلهما الطيبين الطاهرين ولعنة الله على أعدائهم أجمعين أبد الآبدين

In the name of Allah the Compassionate and the Merciful. We asking help to Allah: verily He is the best Helper. Praise Allah, the Lord of the worlds. May Allah pray on Mohammad, Eali and their family the virtuous, the pures and curse of Allah be with their enemies forever and ever.

قالقُ الإصباح وجعل الليل سكناً والشمس والقمر حُسباناً
Cleaver of the daybreak. He has appointed the night for resting, and the sun and the moon for reckoning. Such is the measuring of the All-Mighty, the All-Knowing.

The mean solar time of the calendars of Ḥayāt-aġlā Foundation is Mean Time KMT, Kaġbah - Makkah

THE ANNUAL LETTER OF THE Religious Ephemeride

Thu	15	6	6	14	27	
The gatherings of acquisition of knowledge, manifestation of disavowal (barāʾat) and declaration of allegiance (welāyat).						
The first night of Šawwāl				Get acquainted and be ready for the month of Šawwāl		
The first day of Šawwāl				Performance of ʿĪd Feīr prayer (if the conditions permit it)		
The 15th of Šawwāl				Death of Abō Ṭāleb ٱ (mention of his virtues and mourning for the calamities)		

Penumbral, total and partial lunar eclipse on 14th Šawwāl 1442.

The night before the day of Wednesday 14 Šawwāl 1442 = 5 Gemeni = 5 Ķordād 1400 = The night before the 26th May2021.

Location: This eclipse will be visible in America, East Asia and Western Australia.

In those areas the signs prayer is obligatory.

This eclipse is Member 56 of 84 of saros 121.

Umbral magnitude: 1.9540

Penumbral magnitude: 1.0095

The legend of the codes of diagram against:

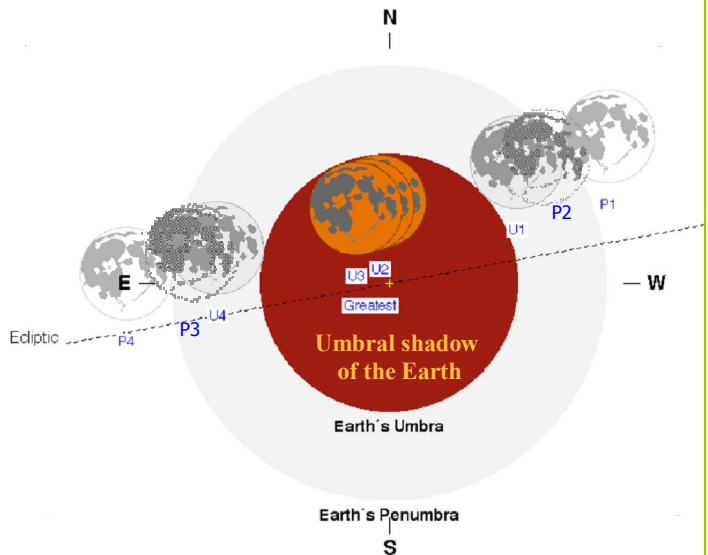

P1: first point of exterior contact times with the penumbra

P2: The penumbra covers two-thirds of the moon's surface= the beginning of the penumbral eclipse

U1: first point of external point of contact with the shadow= the beginning of the partial eclipse

U2: the beginning of total eclipse

U3: the end of the

total eclipse

U4: the end of the partial eclipse

P3: the last point where penumbra covers two-thirds of the moon's surface= the end of the penumbral eclipse

P4: last point of exterior contact times of the Moon's penumbral shadow

The hours of the penumbral, total and partial eclipse:

In the Šariča, the criterion which determines the obligation of the signs prayer is the observation with naked eye of the eclipse from the Earth's surface. The penumbral eclipse of the Moon becomes noticeable when penumbral shadow of the Earth cast onto the two-thirds of the full Moon and dims its surface.

The eclipse will begin at 11:47 KMT (P1) but it's only around 12:29 KMT that Penumbra will cover the two-thirds of the Moon's face (P2) causing the moon to darken and appear to change color on the southern half of the Moon.

At this moment, the signs prayer is obligatory. Before this, color change and darkening of the Moon are not perceptible.

The partial eclipse will begin at 12:45 KMT (U1) and will finish at 15:52 KMT (U4).

The total eclipse will begin at 14:11 (U2) and will finish at 14:26 KMT and approximately at 16:11 KMT, two-thirds of the moon will be in darkness (P3).

After this point, the color change of the Moon will no longer be visible. So, according to the Šariča, it will be the end of the eclipse and the end of the obligation of signs prayer despite that, in fact, the eclipse, as an astronomical event, will continue until 16:49 KMT (P4).

The areas of visibility of the penumbral, total and partial eclipses:

In the following map; the grey-shaded areas are the zones where the penumbral eclipse will happen.

In the other areas, the eclipse will not be visible.

The center of the eclipse will happen in the middle of the Pacific Ocean.

About the areas of the penumbral lunar eclipse located between P1 and P4, in Americas, the eclipse will occur in the setting of the Moon. And between P1 and P4, in Asia and Australia, the eclipse will occur in the rising of the Moon.

Observation areas of all the phases of the penumbral, partial and total eclipses:

In grey-shaded areas located between P3 and P2, all the phases of the eclipse will be observed after moonrise and the eclipse will end before moonset.

In those areas, the eclipse will be the longer.

In grey-shaded areas located between U1 and U4, the partial eclipse will begin after moonrise and will end before moonset.

In grey-shaded located between U3 and U2, the total eclipse will begin after moonrise and will end before moonset.

In this area the total eclipse will be the longer.

Observation areas of some phases of the penumbral, partial and total eclipse:

In Asia and Australia: In areas located between P3 and U4, the end of the penumbral eclipse of the Moon will happen after moonset, therefore the eclipse in those areas will not be visible. Similarly, for the end of the partial eclipse in the areas between U4 and U3.

Between U3 and U2, for the total eclipse

and between U2 and U1, for the partial eclipse

and between U1 and P2 for penumbral eclipse, the observation of the eclipse will not be possible in areas where the eclipse will occur after moonset.

In Americas:

In areas located between P3 and U4, the end of the penumbral eclipse will occur before moonrise, therefore the eclipse will not be visible.

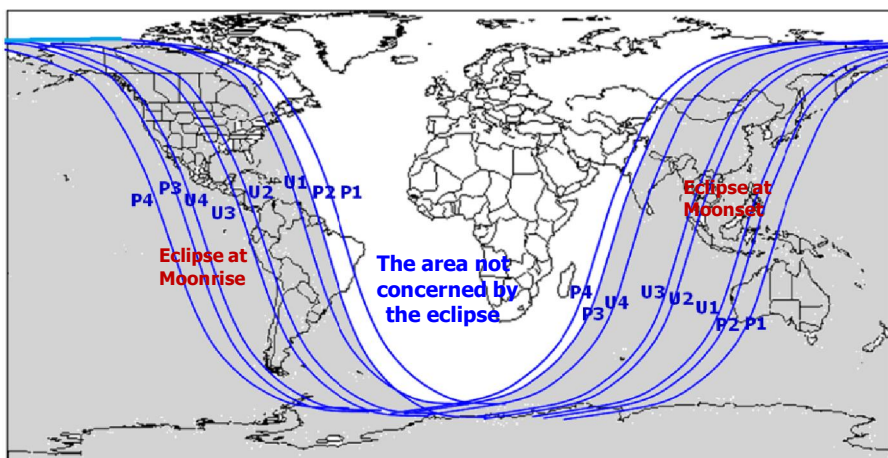

Similarly, in the areas between U3 and U4 for the end of the partial eclipse.

Between U3 and U2, for the total eclipse

and between U2 and U1, for the beginning of the partial eclipse

and between U1 and P2, for the beginning of the penumbral eclipse, the observation of the eclipse will not be impossible given that the eclipse will occur after moonrise.

On the map, the white areas, between P1 and P2 and the areas between P4 and P3, the penumbral eclipse only will occur but it will not be perceptible because the penumbra will cover less than two-thirds of the full Moon and the color change of the Moon will not perceptible. In those areas, according to the criteria of the Šariċa, there is no eclipse and no signs prayer.

Astrological chart of the mid eclipse

The middle of this Lunar eclipse will occur at the Moon's ascending node in the 6th degrees of sidereal Scorpio

The gatherings of acquisition of knowledge, manifestation of disavowal (barāāt) and declaration of allegiance (welāyat).

The 25th of Šawwāl	Martyrdom of Ĥadrat Ēmām Sādeq ؑ (mention of his immense rank and commemoration of the dramas suffered)
--------------------	--

Annular and partial Solar eclipse on 29th Šawwāl 1442

The night before the day of Thursday 29th Šawwāl 1442 = 20th Sagittarius = 20th Khordad 1400 = 10th June 2021.

Location: From North America to Europe and North Asia

Eclipse path:

This eclipse is Member 23 of 80 of Saros 147. The eclipse will begin above the Atlantic Ocean and in the North of America at 11:12 KMT and will continue its path, crossing the Ocean and North Africa, Europe and North Asia for finishing its path above East Asia and China at 16:11 KMT. The maximum of the eclipse will occur at 13:42 KMT in the north of Canada with a magnitude of 0.9435.

About the annular eclipse, it will reach a width of 527.1 kilometers for a duration of 3 minutes and 51 seconds.

About the map of the eclipse path:

The area determined by a pink line on the left side of the map, shows the area where the eclipse will begin.

The area determined by a pink line on the right side of the map, shows the areas where the eclipse will end.

In the area determined by a pink line on the left side of the map, the solar eclipse will begin at the end of the night.

The area determined by a pink line, on the extreme left side of the map without blue line, designates the zone where the eclipse will be visible at sunrise. In this area, the eclipse will begin from the mid eclipse.

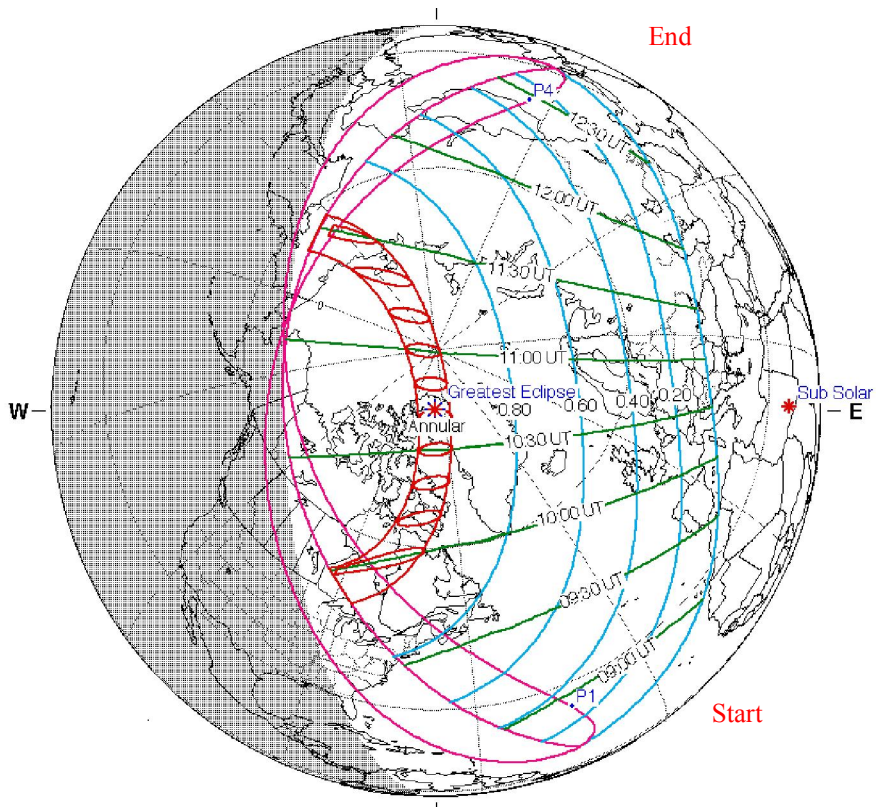

The area determined by a pink line on the left side of the map with blue lines, designates the mid eclipse and the phases of the eclipse after sunrise.

In the area determined by a pink line on the right side of the map, the night will begin before the end of the eclipse, so, the end phases of the eclipse will not be observed.

The area determined by a pink line on the extreme right side of the map with blue lines, designates the area of the mid eclipse and the phases after it, that will happen before sunset.

The area determined by a pink line on the right side of the map with blue lines, designates the mid eclipse and the phases after it, which will happen after sunset. In this area, it will be only in the late afternoon, before sunset, that the beginning of the eclipse will be visible. In this area, nor mid eclipse nor the end of the eclipse will not be observed.

Outside of this zone, in areas determined by blue lines, all the phases of the eclipse will be observed.

Perform signs prayer

The beginning of the time of signs prayer is the beginning of the eclipse.

It is not appropriate to delay the fulfillment of the prayer beyond the mid-eclipse.

The time of signs prayer terminates with the end of the eclipse.

In the table below those times have been listed. The obligation of signs prayer is starting with the beginning of the eclipse. In the table, the hours of the beginning of the eclipse have been mentioned in the first column.

As, it is not appropriate to delay the signs prayer after the middle of the eclipse (when the eclipse reaches its full development), the hours of the mid-eclipse have been mentioned in the second column. In this column, when no hour has been mentioned, it means that in this city, the eclipse will happen after the second half of the eclipse: in those areas, the signs prayer must be immediately performed, without delay in any case.

The hours of the end of the eclipse have been listed in the last column: the hours mentioned in this column are also the hours of the end of the signs prayer.

Characteristics of Solar Eclipse (in local time: LMT)

Cities names	Eclipse beginning	Sun's altitude	Maximum eclipse	Sun's altitude	Sun's azimuth	End of Eclipse	Sun's altitude	Magnitude	Maximum eclipse

Month of Šafar

Following of **the mourning for Ēmām Ĥosayn** ﷺ
and days of **grief and captivity of the House Hold of the Prophet** ﷺ
Šalla l-lāho ėalayka yā mawlā yā abā Moĥammad al-Ĥassan al-Moĵtabā
The seventh day of the month of Šafar
the martyrdom of Ĥādrat Ēmām Ĥasan Moĵtabā ﷺ

View of the Sanctuary of the martyrs of Šeffin battle

The eighteenth day of Šafar is the commemoration of the martyrs of the Šeffin battle. Ĥādrat Mawlā himself made the funeral prayer and buried them himself (Ēamār, Oweys, Ĥazīmeh, Abol Heyĉam and ...). This place is also the qadamgah and mošallā of Ĥādrat Mawlā, Ĥādrat Ēmām Ĥasan Moĵtabā and Ĥādrat Ēmām Ĥosayn. The importance of this place is so remarkable that it is worthy recommended to go there for ziyārat and spending a few days near the martyrs. Allāh grants this success to all believers.

A shrine has been built in Ar-Raqqa in Syria. This shrine is the result the efforts of Ayatollāh Fehrī. But recently it has been destroyed by the Nāsebīs

To get more details about those topics refer to the divin calendar of the month of Šafar in **welāyat** and **barāāat** times and **Ĥayāt-aēlā Media** in website of **Ĥayāt-aēlā** Foundation: <http://www.Aelaa.net/Fa/viewforum.php?f=167>

Yā Rasōlo-llāh, Yā ʿeśmato-llāh

The early days of the month of Rabiʿ al-awwal
the days of mourning for
Moḥammadi, Moḥseni and ʿĀskari ﷺ

صَلَّى اللهُ عَلَيْكَ يَا رَسُولَ اللهِ صَلَّى اللهُ عَلَيْكُمْ يَا أَهْلَ بَيْتِ النَّبَوَةِ
Šalla-llāho ʿalayka yā Rasōlo-llāh
šalla-llāho ʿalaykom yā Ahle bayte nobowwat

To get more details about this subject refer to the divin calendar of the month of Rabiʿ al-awwal in the *welāyat and barāʿat times* web site of *Ĥayāt- aʿlā* Foundation:
www.aelaa.net/Fa/viewforum.php?f=168

يا مولاتي يا فاطمة الزهراء أعيشيني

Yā Mawlāti Yā Fātēmah Zahrā Aḡiḥini

View of Rawdato-Nnabi and the main door of the house of ḥazrat Mawlā and Fātēmah through which Gabriel didn't enter without permission. When ḥazrat Moḥammad wanted to enter in this house, he laid his two hands on the both sides of the door and with a loud voice so that the people of the mosque hear, he recited the verse of the holy Qoran about the virtues of the Ahlol-Bayt and said salam to them and if he didn't hear answer, he turned and went away. This same door has been broken and burned and three people were done martyrs. The Muslims (with the exception of a few persons) watch this drama without saying anything.

In the left side of the picture; the door of the house of Fātēmah. To hide it, the Wahhabis have put some shelves on doorstep and they have eliminated the inscription that was above the door.

The 7th day of Rabi' al-Āḡar	Martyrdom of Ĥadrat Ēmām Bāqer ﷺ (mention of his immense rank and commemoration of the dramas suffered)

Penumbral and partial lunar eclipse on 13 Ĵomādāal-Āķar 1443.

Date of the eclipse:

Friday 13th Ĵomādāal-Āķar 1443 = 28th Scorpio = 28th Aban 1400 = the night before de day of 19th November 2021.

Location : This eclipse will be visible in the West Africa, Europe, America, East Asia and Australia.

In those areas the signs prayer is obligatory.

This eclipse is Member 46 of 72 of Saros 126.

Umbral magnitude: 1.1829

Penumbral magnitude: 2.0720

The legend of the codes of diagram:

P1: first point of exterior contact times with the penumbra

P2: The penumbra covers two-thirds of the moon's surface= the beginning of the penumbral eclipse

U1: first point of external point of contact with the shadow= the beginning of the partial eclipse

U2: the beginning of the total eclipse

U3: the end of the total eclipse

U4: the end of the partial eclipse

P3: the last point where penumbra covers two- thirds of the moon's surface= the end of the penumbral eclipse

P4: last point of exterior contact times of the Moon's penumbral shadow.

The hours of the penumbral, and partial eclipse:

In the Šariĉa, the criterion which determines the obligation of the signs prayer is the observation with naked eye of the eclipse from the Earth's surface. The

penumbral eclipse of the Moon becomes noticeable when penumbral shadow of the Earth cast onto the two-thirds of the full Moon and dims its surface.

The eclipse will begin at 09:02 KMT (P1) but it's only around 09:42 KMT that Penumbra will cover the two-thirds of the Moon's face (P2) causing the moon to darken and appear to change color on the southern half of the Moon.

At this moment, the signs prayer is obligatory. Before this, color change and darkening of the Moon are not perceptible.

The partial eclipse will begin at 10:29 KMT (U1).

Middle of eclipse at 12:04 KMT

The end at 13:47 KMT (U4).

After this point, the color change of the Moon will no longer be visible. So, according the Šariča, it will be the end of the eclipse and the end of the obligation of signs prayer despite that, in fact, the eclipse, as an astronomical event, will continue until 15:04 KMT (P4).

The areas of visibility of the penumbral and partial eclipse:

In the following map; the grey-shaded areas are the zones where the penumbral eclipse will happen.

In the other areas, the eclipse will not be visible.

The center of the eclipse will happen in the Pacific Ocean. About the areas of the penumbral lunar eclipse located between P1 and P4, in Africa and America, the eclipse will begin with moonset.

Between P1 and P4, in Asia and Australia, the eclipse will happen with moonrise.

Observation areas of all the phases of the penumbral and partial eclipse:

In grey-shaded areas located between P2 and P3, all the phases of the eclipse will be observed after moonrise and the eclipse will end before moonset.

In those areas, the eclipse will be the longer.

In grey-shaded areas located between U1 and U4, the partial eclipse will begin after moonrise and will end before moonset. In this area the partial eclipse will be the longer.

Observation areas of some phases of the penumbral and partial eclipse.

In America:

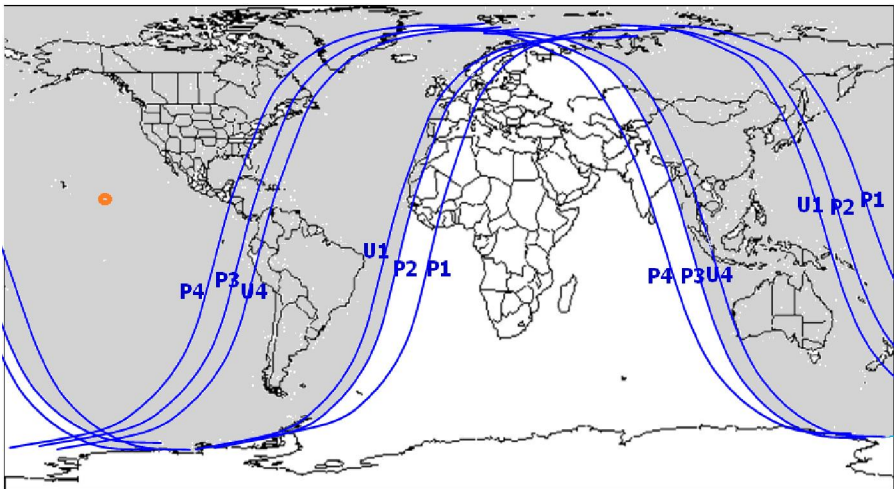

In areas located between P3 and U4, the end of the penumbral eclipse of the Moon will happen after moonset, therefore the eclipse in those areas will not be visible. Similarly, between U4 and U1, for the partial eclipse, between P2 and U1 for penumbral eclipse, the observation of the eclipse will not be possible in areas where the eclipse will occur after moonset but in areas where the eclipse will coincide with Moonrise, the eclipse will be visible.

In East of Asia and Australia:

In areas located between P3 and U4, the end of the penumbral eclipse will occur before moonrise, therefore the eclipse will not be visible.

Similarly, in the areas between U4 and U1 for the end of the partial eclipse. And between P2 and U1, for the end of the penumbral eclipse, the observation of the eclipse will not be impossible given that the eclipse will occur after moonrise but areas where the eclipse will coincide with moonrise, the eclipse will be visible.

On the map, the white areas, between P1 and P2, in the West America and the areas between P4 and P3, in in the East of America, the penumbral eclipse only will occur but it will not be perceptible because the penumbra will cover less than two-thirds of the full Moon and the color change of the Moon will not perceptible. In those areas, according to the criteria of the Šariča, there is no eclipse and no signs prayer.

Perform signs prayer

The beginning of the time of signs prayer is the beginning of the eclipse.

It is not appropriate to delay the fulfillment of the prayer beyond the mid-eclipse.

The time of signs prayer terminates with the end of the eclipse.

In the table below those times have been listed. The obligation of signs prayer is starting with the beginning of the eclipse. In the table, the hours of the beginning of the eclipse have been mentioned in the first column.

As, it is not appropriate to delay the signs prayer after the middle of the eclipse (when the eclipse reaches its full development), the hours of the mid-eclipse have been mentioned in the second column. In this column, when no hour has been mentioned, it means that in this city, the eclipse will happen after the second half of the eclipse: in those areas, the signs prayer must be immediately performed, without delay in any case.

The hours of the end of the eclipse have been listed in the last column: the hours mentioned in this column are also the hours of the end of the signs prayer.

Eclipse Partial duration: 3 hours and 28 minutes

Penumbral and Partial lunar eclipse duration: 4 hours and 8 minutes

Total and partial Solar eclipse

On 28th Rabi' al-Ākar 1443.

.Date of the eclipse: According Mean Time KMT, Ka'bah – Makkah

The night before the day of Tuesday 28th Rabi' al-Ākar 1443 = 13th Capricorne = 13th Āžar 1400 = 4th december 2021.

Location: From South Pole to West Africa.

Eclipse path:

This eclipse is Member 13 of 70 of Saros 152.

The eclipse will start above south Africa at 08:29 KMT and will continue its path crossing the Atlantic Ocean and will end in South Pole at 12:37 KMT.

The maximum eclipse will occur at 10:33 KMT with a magnitude of 1.0367.

About the map of the eclipse path:

The area determined by a pink line on the left side of the map, shows the area where the eclipse will begin.

The area determined by a pink line on the right side of the map, shows the areas where the eclipse will end.

In the area determined by a pink line on the left side of the map, the solar eclipse will begin at the end of the night.

The area determined by a pink line, on the extreme left side of the map without blue line, designates the zone where the eclipse will be visible at sunrise. In this area, the eclipse will begin from the mid eclipse.

The area determined by a pink line on the left side of the map with blue lines, designates the mid eclipse and the phases of the eclipse after sunrise.

In the area determined by a pink line on the right side of the map, the night will begin before the end of the eclipse, so, the end phases of the eclipse will not be observed.

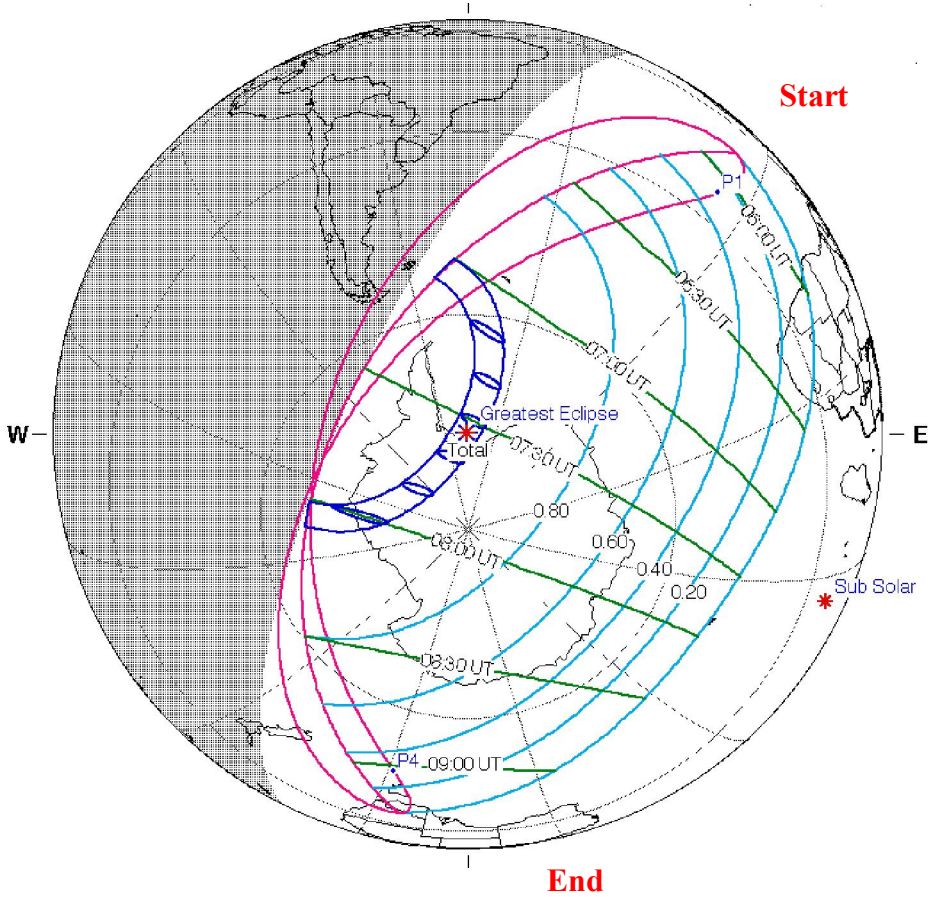

The area determined by a pink line on the extreme right side of the map with blue lines, designates the area of the mid eclipse and the phases after it, that will happen before sunset.

The area determined by a pink line on the right side of the map with blue lines, designates the mid eclipse and the phases after it, which will happen after sunset.

In this area, it will be only in the late afternoon, before sunset, that the beginning of

the eclipse will be visible. In this area, nor mid eclipse nor the end of the eclipse will not be observed.

Outside of this zone, in areas determined by blue lines, all the phases of the eclipse will be observed.

Perform signs prayer

The beginning of the time of signs prayer is the beginning of the eclipse.
It is not appropriate to delay the fulfillment of the prayer beyond the mid-eclipse.
The time of signs prayer terminates with the end of the eclipse.

In the table below those times have been listed. The obligation of signs prayer is starting with the beginning of the eclipse. In the table, the hours of the beginning of the eclipse have been mentioned in the first column.

As, it is not appropriate to delay the signs prayer after the middle of the eclipse (when the eclipse reaches its full development), the hours of the mid-eclipse have been mentioned in the second column. In this column, when no hour has been mentioned, it means that in this city, the eclipse will happen after the second half of the eclipse: in those areas, the signs prayer must be immediately performed, without delay in any case.

The hours of the end of the eclipse have been listed in the last column: the hours mentioned in this column are also the hours of the end of the signs prayer.
